What is APOonline?

APOonline is an online chapter management system created for Alpha Phi Omega chapters and petitioning groups to manage their membership, finances, and events.

How does it work?

APOonline will provide your petitioning group with a website so you can advertise to your campus and direct interested students to contact you.

All active members will have their own account and profile. Officers will be able to post events and members will get weekly emails letting them know what's going on that week and links to go sign up. Service hours are automatically logged through event attendance making it easy for your officers to keep track of everything.
