

You can bend the curve on the diabetes epidemic

The Diabetes Risk Test

Our Mission. To cure diabetes, to prevent diabetes and to improve the lives of those living with diabetes.

The Challenge. Nearly 1 in 2 American adults has diabetes or prediabetes.

- 84 million adults have prediabetes
- 90% of them are not aware of their risk for diabetes

Connect with Us to Change Outcomes

Increase number of screenings—Drive more diabetes screening among at risk population

Increase awareness—Move at-risk to state of awareness and action

Increase action—Take and share the risk test.

Follow up with your doctor and take steps to live well with diabetes.

Are you at risk for type 2 diabetes?

Consider taking the American Diabetes Association Risk Test if you:

Are 45 years or older, or

Are an overweight adult of any age, and

- have a parent, brother, or sister with type 2 diabetes
- are physically inactive
- have ever had gestational diabetes (diabetes during pregnancy)
- have high blood pressure
- have a history of cardiovascular disease

There are other risk factors.

Talk to your doctor if you have concerns.

You Can Help Prevent Diabetes. Together we have the opportunity to increase awareness of both diabetes and an individual's risk for developing the disease. We need the most influential people and organizations in this community to share the Type 2 Diabetes Risk Test.

What is the American Diabetes Association Risk Test?

- A simple 7 question test that takes a minute to complete
- High/low results scale indicates their risk for type 2 diabetes
- Provides next steps and how-tos to help manage their risk
- Scientifically proven and used by the CDC and AMA

Sharing the risk test with employees, customers and the community is simple and flexible.
